United States Department of Agriculture

Forest Service District 1

District 1 includes 23,000,000 acres of National Forest land in Montana, Idaho north of Salmon River and Stevens county, Washington. The work of the District is under the direction of a District Forester, assisted by four Assistant District Foresters in charge of the Officers of Silviculture, Lands, Grazing, and Operation, a District Law Officer and a District Fiscal Agent. The 23,000,000 acres are divided into units of administration of approximately 1,000,000 acres each which are under the direction of Forest Supervisors. The District Forester corresponds to the General Superintendent of a railroad, and the Forest Supervisor to the Division Superintendent. The forest unit of 1,000,000 is further subdivided into Ranger Districts of 100,000 to 300,000 acres each. Activities include all work connected with the growing of, the cutting of and utilization of timber and incidentally the use and occupancy of lands for water power, grazing, summer residences and the like. Fire protection of these resources is the most important work.

District 1 has a stand of 70 billion ft. B. M. of timber. There is cut each year two hundred million ft. B. M., valued at \$400,000. 800,000 sheep, 140,000 cattle and horses graze on the open parks and summer ranges of the Forests each year. The expenditures for administration, including constructive work such as trail and road building, telephone line construction, is approximately \$1,000,000. The present income, which is increasing each year, is approximately \$500,000.

In Missoula are the headquarters of the District Organization, and three Forest Supervisors, including 80 people, with a payroll of approximately \$100,000 per year.

CHAS. K. M'HARG, JR.

Forest Assistant in Silviculture.

CARL M. STEVENS

Forester Examiner, Acting in charge of Office of Silviculture, Federal Bldg.

R. B. ADAMS

Superintendent of Telephone Office of Operation, Federal Bldg.
